TOYOTA

Introduction

About this Manual

This manual represents the start-up guide for the ZEED T-Connect smartphone application provided to users who purchase new Toyota vehicles. It provides details on initial setup and registration, details on the services available, and details on how to use the application.
Ensure that this manual is read thoroughly prior to using ZEED T-Connect, and check the usage conditions and licensing agreement.

In addition to being a high-function navigation system, ZEED T-Connect provides leading-edge spot information and a wide range of other information services via smartphone to support the user.

Abdul Latif Jameel Retail Co. Ltd.

©2014 Abdul Latif Jameel Retail Co. Ltd.

The transcription, copying and transferal of this manual without prior permission is strictly forbidden.

Precautions when Using ZEED T-Connect

Digital Map Information for Route Guidance Purposes

● The map information provided in the navigation system may differ from actual conditions owing to a variety of reasons, such as the passage of time and natural disasters, etc.

● The information and routes suggested as navigation guidance are simply advice to provide users with comfortable levels of driving. Drivers are required to use their own judgment and drive in accordance with actual traffic signs and local conditions.

● Toyota cannot be held responsibility for damage or loss incurred for reasons attributable to incorrect map information, or any other damages.

Navigation System Operations

● For safety reasons, drivers must not concentrate on operations or the screen while driving. Failure to observe this may result in a lack of caution and lead to accidents. All operations must always be carried out with the vehicle halted in a safe location.

● Drivers are requested to check out the route they intend to travel prior to departure. The navigation will provide audio guidance on the route when the vehicle starts moving.

Introduction

Provision of Services

The ZEED T-Connect application for smartphones is a high-function navigation system that provides a wide range of services to drivers including optimal route guidance to the chosen destination and information regarding chosen locations.
Anybody can take advantage of these services simply by downloading the application.
In addition, further convenient content can be used by becoming a ZEED T-Connect member.

ZEED T-Connect Membership

A membership system enabling members to use all ZEED T-Connect contents.

Feature	Summary
Navigation	A system that provides optimal route guidance from the current location to the destination
Operator Service	The call center operator talks to you to set your desired destination
Inbox	Receives information messages from dealer
Off-road Map	Displays the present location and direction to destination on the map even for off-road areas
Qibla Compass	A compass that displays Qibla
Prayer Times Notification	Pre-set prayer time alerts are notified and mosque locations are displayed on the navigation screen
Information	Provides latest information, notifications and Q&A on application usage

1 Getting Started

Downloading the ZEED T-Connect Application

### Android Phone：Download via QR code

1. Read the QR code using your smartphone.
   ZEED T-Connect download site will be displayed.

### Android Phone：Download from the Google Play for Android users

1. Press on on the Android phone.

2. Tap on on the top right of the screen.

3. Enter "ZEED" or "T-Connect" in the
   🔍 Search Google Play field and search.

4. Select the application.

5. Click on the "Install", read through the
   application explanation and if you agree with
   contents, click on "Agree".

6. Once installation is complete, "ZEED T-Connect"
   is can be used.

Android Phone：When installing via a PC
1. Go to https://play.google.com/store on the browser,
   enter "ZEED" or "T-Connect" in the 🔍 Search
   field and select "ZEED T-Connect".

2. On the "ZEED T-Connect" page,
   click on "Install".

Please sign in to continue
In order to purchase ZEED T-Connect , you must sign in.
Cancel   Sign in

3. Click on "Sign in".

4. Enter your Google ID (e-mail) and password
   and click on "Sign in".

1 Getting Started

Downloading the ZEED T-Connect Application

5. Select the device which you would like to install the application on and click "Install".

6. The left screen will be displayed.
Click on "OK" to start installation.

7. After download is complete, the application will be installed in the device selected in 4.

iPhone : Download via QR code

1. Read the QR code using your smartphone.
ZEED T-Connect download site will be displayed.

iPhone : Download from the App Store for iPhone users.

1. Press the iPhone button.

2. Select from the menu displayed at the bottom.

3. Enter "ZEED" or "T-Connect" in the field and run a search.

4. Select the application.

5. As soon as ZEED T-Connect has downloaded, it can be used.

Downloading the ZEED T-Connect Application

iPhone: When installing via a PC

* In order to install on an iPhone using a PC, Apple iTunes (free file management tool) is required.
  Download from http://www.apple.com/itunes/

1. On the "ZEED T-Connect" page, click "Free".

2. Input your Apple ID and password, and click "Get".

3. The download will start, and the application will be saved to the PC.

4. When download has completed, connect the iPhone to the PC using a genuine Apple cable.

   * Do not connect the iPhone to the PC before the download has completed.
   * Depending on the usage environment, the PC may not sync with the iPhone. In this case, in iTunes, click "Sync".

5. When sync has completed, you can use ZEED T-Connect.

1 Getting Started

## Prior to Using ZEED T-Connect (for ZEED T-Connect Members)
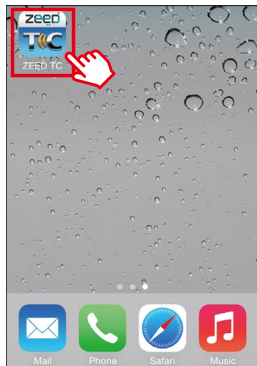

If you do not have a ZEED ID, please proceed as follows.
（If you already have a ZEED ID, please proceed to step 8）
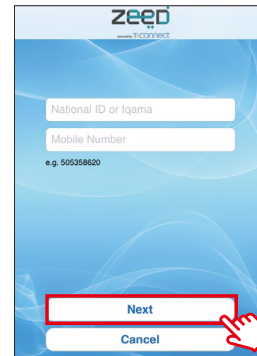

1. Start "ZEED T-Connect" application.

Login Screen

2. Press the "Register" button.

ZEED ID Confirmation Screen

3. Press the "No" button.

National ID/ Iqama Confirmation Screen

4. Enter your "National ID" or "Iqama" and your telephone number that was registered at the time of purchasing your car and press the "Next" button.

Invalid National ID/ Iqama is input. Please check your National ID / Iqama or connect our Support Center.

3 ZEED T-Connect Function Descriptions

Navigation

Navigation is a service that uses the current location as a start point to provide route guidance to a destination.

GPS satellites are used to display the vehicle's current location on a map downloaded beforehand. When a desired destination is entered, the screen displays the optimal route from the current location, and provides route guidance to that destination. In addition, since the current location and the direction to the set destination can be displayed on the Off-road Map, even for off-road areas, the destination can always safely be reached.

Moreover, navigation is high-function system that can offer the optimal route to the destination using information distributed from the Toyota Smart Center.
 Navigation

 Off-road Map

* If a destination has been set on the Off-road Map, route guidance will not be provided once the vehicle has entered off-road areas. Instead, only the traced path will be displayed.
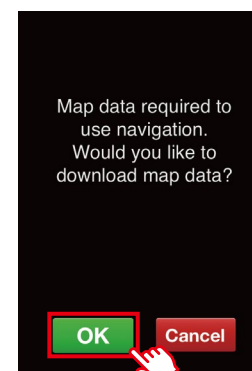

Downloading Maps (Wi-Fi environment recommended)*

To use the navigation system, it is first necessary to download the map data.

* Owing to the large volume of map data, it is recommended that downloads are carried out on a Wi-Fi environment. Downloading maps from the cell phone network will take time owing to the large volume of data, and there are consequently cases in which heavy charges for packet data communications may be incurred.
* The download may take a considerable amount of time due to the quantity of data. Therefore, verify that there is sufficient battery charge prior to starting the download process.
* In the event of the connection being cut off during downloading, the download will recommence from the place of the cut off when the connection has been reestablished.
* In some cases, it may take several minutes to display the downloaded map data.
* The map data is updated twice a year.
* In general, it is necessary to download the map data directly from the smartphone.

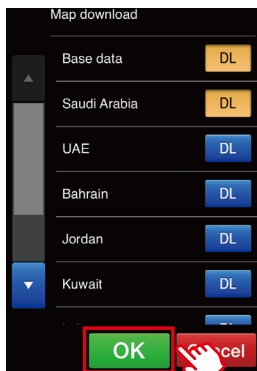

1. Press the button on the main menu.

2. A message stating [Download map] will be displayed. Press the OK button.

3 ZEED T-Connect Function Descriptions

Downloading Maps (Wi-Fi environment recommended)*

Base data 252MB and country data is required to use navigation. Downloading via wi-fi is recommended.

OK Cancel

3. An explanation on why a Wi-Fi environment is recommended will be displayed. Press the OK button.

Map download

Base data	DL
Saudi Arabia	DL
UAE	DL
Bahrain	DL
Jordan	DL
Kuwait	DL

OK Cancel

4. Select the [DL] button for the country in which the map is to be used, and then press the OK button.

* To use Navigation and the Off-road map, first download the map data.

Download successful

OK
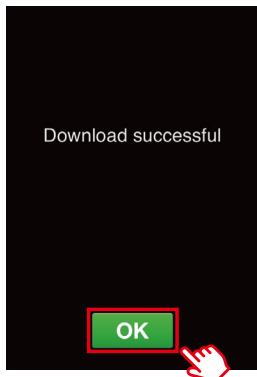

5. Press the OK button when downloading has been completed.

## Route Guidance

Setting Destinations with the Search Menu

Destination Search

The following types of destination searches can be run on Navigation and the Off-road Map.

* Perform operations after stopping the vehicle in a safe location.

1. Press the Navi Navigation button on the main menu.

2. The map screen will be displayed with the user's current location automatically indicated, and the following operations are then possible.
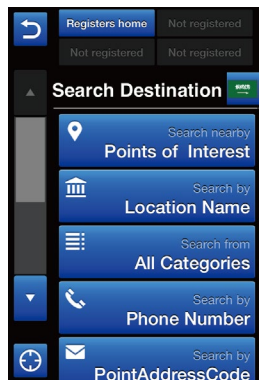

Press the button to select the search method.

* If the user's current location cannot be obtained, the initial setting value is displayed.
